9 Wessel Cresent
Montana Cape Town

## Expertise

Java programming

HTML, CSS and JavaScript

Authentication and

Authorization concepts

Project Management

Critical Thinking

Leadership

Problem-Solving

## Language

English

## Summary

Current Focus:

**Application development**

I am an application developer with expertise in Java, systems, and quality management frameworks. Skilled with applying SOLID principles, builder patterns, and UML modeling to create and maintainable, scalable solutions .

Work Experience:

I have developed practical web applications using HTML, CSS, and JavaScript, with a main focus on clean and simple structures, responsive design,n and interactive functionality. I have experienced front-end and back-end development.

Currently completing my National Diploma in IT Applications Development, with strong foundations in networking, systems analysis, and database design. I am looking to expand my expertise by learning cybersecurity, with a focus on secure coding practices, vulnerability mitigation, and safeguarding digital systems. Known for clear communication of technical concepts, collaborative problem-solving, and a structured approach to delivering a user-focused application.

## Education

Cape Peninsula University of Technology District 6

2022 - 2026
